22. REMARKS

**12a. Prescribed Drugs, continued**

- (5) For program benefits, only the direct costs associated with the Program Benefit investment, including non-monetary benefits such as in-kind goods and services, in the program by the manufacturer or labeler will count as reducing the amount of the supplemental rebate owed. The savings or reduced claim experience that may result from the investment does not reduce the amount of the supplemental rebate owed.
- (6) Program benefits received by the State will be treated as supplemental rebates and will be shared with the Federal government on the same percentage basis as applied under the national rebate agreement. For those manufacturers who have a Program Benefit Agreement, the State will determine the amount of supplemental rebate owed by the manufacturer at the end of a year. This amount represents 1) the potential total amount of Program Benefit investment by the manufacturer for the year, and 2) the basis for determining the amount of supplemental rebate that will be shared with the Federal government. For the CMS-64, the State will reduce its other Federal claims by the amount of the Federal share of the entire supplemental rebate owed at the end of the "Texas Health and Human Services Commission Title XIX Vendor Drug Program Supplemental Rebate Agreement" term.
- (7) Where the program benefit amount is less than the supplemental rebate amount, the program benefit amount plus the difference between the full supplemental rebate amount and the program benefit amount will be shared with the Federal government on the same percentage basis as applied under the national rebate agreement.
