Select the appropriate Family Size column corresponding to the AGI to determine the client’s fee per service hour. If a family’s AGI falls above the income level listed at one FPL percentage, but below the next level list, they should be considered within that range on the Fee Schedule table. For example, a family size of 1 with an AGI of \$82,829 would fall within the 501%-550% range and pay a cost share of \$15.00.
