## HCBS-AMH Sample Service Plan

Below is an example of how the existing systems are supporting each other. The HCBS-AMH individual recovery plan supplements services a person already receives through existing supports, most commonly their local mental health authority or local behavioral health authority. HCBS-AMH services are not limited by a person's level of care and can fill in gaps when someone has a greater need or feels they need more support than what is covered by existing services. With this person-centered, comprehensive plan, participants are able to live and thrive in their community.

HCBS-AMH offers a total of 16 services. To learn more about these services, visit [hhs.texas.gov/hcbs-amh](https://hhs.texas.gov/hcbs-amh).
