About State Health and Value Strategies

State Health and Value Strategies (SHVS) assists states in their efforts to transform health and health care by providing targeted technical assistance to state officials and agencies. The program is a grantee of the Robert Wood Johnson Foundation, led by staff at Princeton University's School of Public and International Affairs. The program connects states with experts and peers to undertake health care transformation initiatives. By engaging state officials, the program provides lessons learned, highlights successful strategies, and brings together states with experts in the field. Learn more at www.shvs.org.

Support for this webinar was provided by the Robert Wood Johnson Foundation. The views expressed in this presentation do not necessarily reflect the views of the Foundation.

Agenda

- 1. Purpose of Today's Meeting
- 2. The Buying Value Measure Selection Tool
- 3. The Buying Value Benchmark Repository
- 4. Questions

Purpose of Today's Meeting

- Review the suite of free Buying Value (BV) tools that can help HHSC save time when considering changes to your managed care performance measures.
 - Demonstrate how the BV measure selection tool can help make metric decisions more objective.
 - Show how to utilize the BV benchmark repository to identify home-grown measures and metrics
- Answer YOUR questions on Buying Value!

TX HHSC and Buying Value

- HHSC creates financial and non-financial incentives for managed care organizations (MCOs) and holds them accountable for performance on certain measures.
- HHSC may find Buying Value's resources helpful for assessing the extent to which its Medical At-Risk Measures and Medical Bonus Pool Measures are aligned with:
 - 1. HHSC's goals for its measures and measure sets
 - 2. Medicaid Adult and Child Core measures
 - 3. Other federal measure sets
 - 4. Other state's MCO performance incentive measures

What is Buying Value?

- A suite of publicly available resources for purchasers to a) find standard measures, as well as innovative non-HEDIS or homegrown measures and associated benchmarks, and b) develop aligned measure sets.
 - 1. Groundbreaking research on the lack of quality measure alignment (2013)
 - 2. The Buying Value Measure Selection Tool (2015)
 - 3. The Buying Value Benchmark Repository (2018)
- Visit: <u>www.buyingvalue.org</u>

Helping Purchasers Define Aligned Measure Sets

Developed in response to <u>provider complaints</u> about being increasingly subject to <u>growing</u> <u>numbers of measures</u> from payers and regulators.

A suite of resources that enables state agencies, private purchasers, and other stakeholders to select measures and develop aligned measure sets.

Key Features

- Over <u>840 measures</u> that can be filtered by 17 domains, 20 conditions, 7 measure types, 9 populations and 13 data sources.
- A <u>disparities-sensitive status indicator</u> that allows users to identify measures with an evidence of inequity in the provision of care captured by the measure.
- Functionality to <u>crosswalk measures to federal, national and state</u>
 <u>measures sets</u> and <u>systematically score</u> measures against a state's
 overarching goals for the measure set.

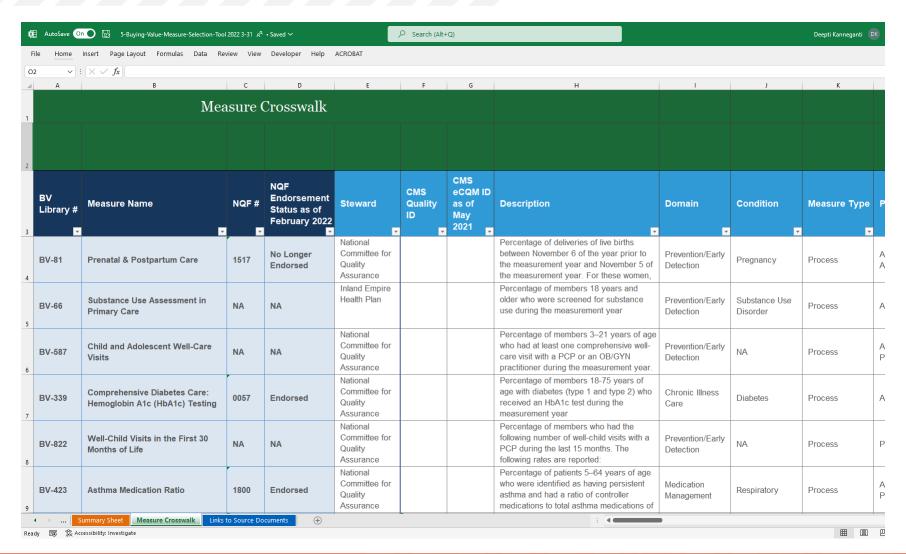

Federal/National Measure Sets (12)

- 1. CMMI Primary Care First
- CMS Medicaid and CHIP Child Core Set
- 3. CMS Medicaid Adult Core Set
- 4. CMS eCQMs for Eligible Professionals
- 5. CMS Health Home Measure Set
- 6. CMS Hospital Value-Based Purchasing
- 7. CMS Medicare Hospital Compare
- 8. CMS Medicare Part C&D
- 9. CMS Medicare Shared Savings Program
- 10. CMS Merit-based Incentive Payment System
- 11. Core Quality Measure Collaborative
- 12. Joint Commission Performance Measures

State Measure Sets (6)

- California AMP Medi-Cal Managed Care Measure Set
- Massachusetts Aligned Measure Set
- 3. Minnesota Integrated Health Partnership Measures
- Oregon CCO Incentive Measures
- Rhode Island OHIC Aligned Measure Set for ACOs
- Washington State Common Measure Set

Buying Value Measure Selection Tool Tutorial

The Buying Value Benchmark Repository

States have had difficulty <u>finding measures that</u> <u>address their program priorities</u> and implementing non-HEDIS measures into value-based arrangements due to the <u>lack of national</u> <u>benchmarks</u> against which to assess performance.

A <u>spreadsheet repository</u> that includes <u>innovative</u> <u>homegrown measures</u> as well as state and regional health improvement collaborative <u>performance on</u> <u>non-HEDIS measures</u>.

Key Features

- Information on <u>nearly 60 measures in use by other states</u>
 <u>and performance data</u> (when available), including:
 - Innovative homegrown measures
 - Non-HEDIS measures that are not homegrown and for which benchmark data are not otherwise available

Case Example: Reasons to Use the Repository

Goal

Find and implement an innovative measure related to health equity.

Problem

It is unclear if there are any measures that are focused on provision of equitable healthcare services.

Solution

- Visit <u>www.buyingvalue.org</u> and download the Repository
- Navigate to either the "High-Level Summary" or "Detailed Responses" tab and key-word search for "Health Equity" to find measures of interest

Goal

Utilize a homegrown measure (e.g., ED
Utilization Among Members with Mental Illness)
in a Medicaid managed care performance
incentive program.

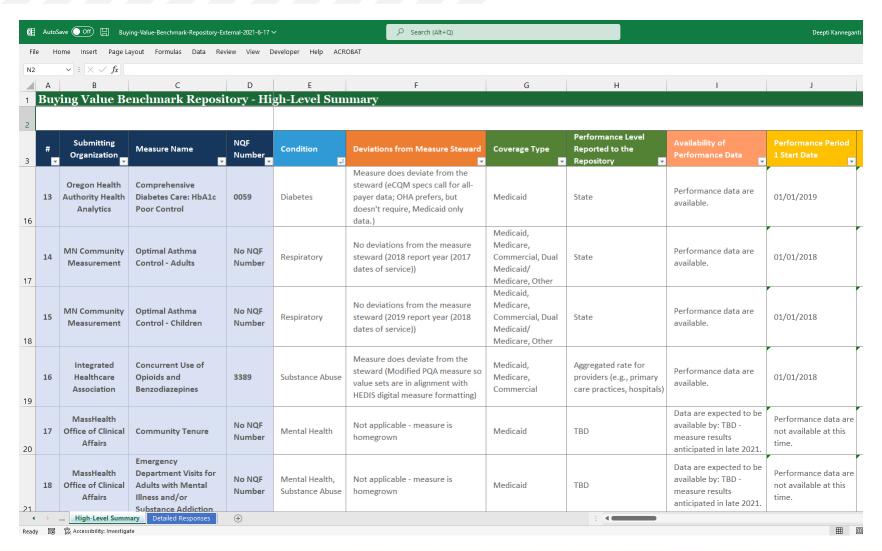

Problem

This is a new measure for the state and there are no external data for the state to consider when setting its MCO performance targets.

Solution

- Visit <u>www.buyingvalue.org</u> and download the Repository
- 2. See if other states are utilizing the measure, and if so, utilize the states' performance to inform setting a benchmark
- 3. Once benchmark data are available, submit your state's performance on that measure to the Repository
